RE: RECYCLING BIN USAGE FOR GARBAGE

NOTE TO ALL OWNERS

It seems we have some owners who do not know proper recycling procedures. Plant material and steel (as in the attached pictures) are not recyclable materials, and therefore should not be placed in the recycling bins. The posted sign clearly states what is intended to go into the recycling bins. As a result of these bins being used for garbage, the cost of disposal has gone up. I have no intentions of going dumpster diving, and again ask that everyone cooperate in the separating of your recyclables and garbage. Garbage bins are provided and surely it is not too much to ask that we use them properly.

Yours truly,

F.R. Rizzardo, AScT, GSC
President
