

Nicola Lakeshore Water Utility Co. Ltd.

December 31, 2009

UTILITY NEWSLETTER DECEMBER 2009

It is sometimes trying to get information to all of the owners and have them act on it.

Please note:

1. There were several more grinder pumps that did not have the recommended insulation installed, and froze in December. These repairs are not covered by warranty.
2. ATV's again have been spotted on private property not owned by the riders. We do not want to ban ATV's from accessing the upper gravel road and the crown land beyond; however, your assistance is requested in the respecting of other people's private property. Be advised that there is no public access along the water line except at the designated roads.
3. This is the perfect time for burning pine needles and dead brush. Please remember that you still need to monitor the fire. I would hate to see anyone being held liable for structure loss from a neighboring property.
4. A reminder to all owners that the new garbage and recycling containers are in place above the operations building. Please use them.

Frank Rizzardo, A.Sc.T.,GSC
