TO ALL LOT OWNERS:

RE: BEETLE TREES – WILDLAND COVENANT

As owners of land in a rural area, we are charged with carrying out our responsibilities in the Wildland Covenant. Last year we saw more trees struck by the pine beetle and as a result we carried out an extensive program on those lands above the upper easement road.

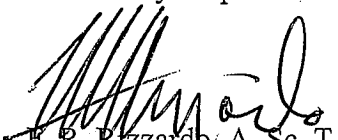

Our combined efforts now need to be placed on lands between the upper access road and the water. I can advise that several contractors have indicated their availability to remove and burn trees for owners for a fee. There are differences in that some with equipment can remove stumps and level the ground, while others only will only fall and burn the trees.

The individuals to call are as follows:

Derek's Excavating	250-280-1369 250-378-1369
Tibar Construction	250-378-1313 250-378-7952
Ralph Hack	250-378-3774

Some of these contractors are doing work now and mobilization costs could be saved by tying into the adjoining work.

Please do your part to keep our development safe.
